Robotic Process Automation

The whole world is adapting itself to the 'New Normal', after Covid-19. Companies are looking out for novel ways to work and scale up their business amid the operational gaps to comply with customer and employee needs. Yes, it's high time for businesses also to adapt to the new Normal - Robotic Process Automation. The automation capabilities can be of any kind, ranging from simple task automation to broader adoption at scale.

Why
ROBOTIC
PROCESS
AUTOMATION
for Business?

> Accomplish complex tasks in no time without any lags

> Get more quantity of tasks done with highest quality & accuracy

> Fix operational gaps & increase productivity

> Robust customer and employee experiences

> Digitize and automate work processes of any scale

What Exactly is Robotic Process Automation (RPA)?

Robotic Process Automation (RPA) aims at automating business processes of any complexities, with minimal human intervention. With the help of RPA tools, a business can secure and figure out applications for processing a transaction, organizing and controlling data, prompting responses,and collaborating with other digital systems. RPA scenarios can vary from simple tasks like generating an automatic email response, to complex programsof automating activities in an ERP system.

Benefits of Investing in Robotic Process Automation (RPA)

> Minimal Headcount Of Staff

> Low Cost

> Zero Mistakes

> Robot Is Active 24/7

> Highest Possible ROI Quickly

> Perform Repetitive Tasks With Ease & Accuracy

> Employees Become More Productive

Applications of
ROBOTIC
PROCESS
AUTOMATION

> **Customer Service** – Improved quality & speed of responsiveness, verifying e-signatures, uploading scanned documents, verifying facts for approvals or rejections

> **Accounting** – General accounting, calculating payroll, amounts receivable, budgeting, or operational accounting, controller function, cost allocation, accounting reconciliation, supplier pricing comparisons, regulatory reporting

> **Human Resources** – Resume screening, candidate shortlisting, onboarding and offboarding, travel and expense management, monthly payroll, employee data management, time and attendance, reports and analysis of surveys and company reviews, onboarding and exit management

> **Healthcare** – Appointment scheduling, medical organizations, reporting, billing, account/claims management, handling patient records, discharge instructions, customer support

> **Financial Services** – Managing audit requests, foreign exchange payments, automating account openings, processing claims, customer service, accounts payable, mortgage processing, KYC, report automation, collection, deposits, fraud detection

> **Supply Chain Management** – Inventory management, procurement, processing payments, supply and demand planning, purchase order management, tracking shipments, returns and refunds processing, invoice management, ERP integration

> **Back Office** – Data collection, managing sales orders, invoice processing, accounting reconciliation, handling queries

> **Scheduling** – Manage the schedule effectively, data compliance, less repetition of work, improved processes, speed up with account settlements

> **Workload management** – Diligent distribution of work across multiple bots, minimizes labor-intensive processes, easy to implement, requires very little technical knowledge to use, faster completion rate, eliminates human error, scalability

> **Document processing** – Easily classifies documents, offers the document in every file format you need, scans the required document, extracts the right data, feeds right into your CRM/ERP software

Now that you know how RPA can benefit your business, you might probably be looking out for someone to help you with RPA solutions. Here are some good reasons to take **Synonix Business Solutions Private Limited** into account.
